

**EO Labs**  
Microbiological Culture Media

Clinical – Veterinary – Aquaculture  
**READY-TO-USE CULTURE MEDIA**

E&O Laboratories Ltd have successfully grown their Culture Media business over the last 30 years to become a leading manufacturer servicing Microbiology Laboratories Worldwide. Our comprehensive media range is continually expanding into specialised industry sectors as well as aiding the rapid diagnosis of the newest antibiotic resistant bacteria strains. Our professional team encompasses a wide range of skills, delivering compliant products with a very high quality personal service. We have strong relationships with our raw material suppliers and a proven track record for continuity of supply. E&O's two manufacturing sites are based in central Scotland with excellent road/rail and airport accessibility. Prospective customers and distributors are welcome to visit/audit and meet our loyal and dedicated team.

#### INDUSTRY SECTORS:

- Clinical, Veterinary & Aquaculture
- Food, Water & Environmental
- Pharmaceutical, Industrial & Cosmetics
- Academia & Research

#### PRODUCT CATEGORIES:

- Ready-to-use Culture Media – Bottled, Bagged and Plated
- Dehydrated Culture Media & Raw Materials
- Antibiotic Supplements & Reagents
- Fresh Donor Horse & Sheep Blood – Frozen Sterile Filtered Serum

#### ORDER OF CONTENTS:

2-3	Company profile
4-8	Ready-to-use Bottled & Bagged Media
8-12	Ready-to-use Petri-dishes
13-15	Containers
16-17	Logistics
17	Contact details

### MANUFACTURE:

E&O's extensive product portfolio is manufactured across two fully automated cGMP facilities at Westfield and Burnhouse (100,000sq ft). All operations are validated to the highest pharmaceutical standards with all environmental and sterilisation processes guaranteeing minimal batch to batch variability. Pumps, balances and dispensing equipment are calibrated by highly trained technicians using industry standard procedures. Disaster strategy implementation ensures customers continuity of supply, not only with product manufacture, but also with raw material supply.

### QUALITY ASSURANCE/QUALITY CONTROL:

Company compliance ensures all manufacturing processes and services meet the required Environmental, Health and Safety and Quality Standards regulated within the different industry sectors using Microbiological Culture Media both nationally and internationally.

- BS EN ISO 9001:2015 & BS EN ISO 13485:2016
- HOME OFFICE PROJECT LICENCE 1986 CERTIFICATE
- UKAS BS EN ISO/IEC 17025:2005
- EN ISO 2859-1:1999 & EN ISO 11133:2014
- IVD CE MARKING – European In-Vitro Diagnostics Medical Devices Regulation 2017/746
- Harmonised MTL methods – USP/EP/JP Pharmacopoeias – International Standards & ISO criteria

### TECHNICAL SUPPORT R&D – OEM – DESIGN:

E&O employ a very highly qualified team of scientists to formulate new media, improve on existing formulations and work with clients to design specialised diluents/reagents and new culture media. A dedicated laboratory area with calibrated modern equipment allows a wide variety of media assays to be performed and designed before scaling up for final customer verification. E&O can source raw materials worldwide and has the in-house expertise to mill, blend, sterilise, aliquot and quality control to any specification in volumes, weights and containers to satisfy client's individual requirements.

### LOGISTICS & DISTRIBUTION:

E&O's logistics department dispatch a wide range of Culture Media and related products with accompanying documentation worldwide. All consignments are packed in secure, insulated (if required) strong, well designed cardboard boxes to ensure contents are not damaged during the transportation process. The quality assurance department have validated (temperature data logged) information ensuring no degradation of product occurs. All UK locations are serviced on a standard "next day" service, "Timed" deliveries can be booked to suit emergency requirements as well as Saturday morning deliveries. Export consignments can be delivered via air, road or sea depending on product type and customer requirement. Having built strong supportive relationships with many distributors worldwide, our product range can be manufactured and shipped on an OEM basis or under the E&O brand.

### ACCOUNT MANAGEMENT:

E&O's finance department controls all quotations, discounts, payment terms and any return of goods credit. Our sales department review all tender notices, distribution costs and account turnovers on an annual basis. E&O strive to deliver competitive packages and are proud of our extremely loyal and growing global customer account network. Detailed up-to-date "Terms & Conditions" can be requested through our Customer Service Department.

### SERVICE:

E&O's front line Customer Service team are always available and happy to direct you to the right department for all routine enquiries. Our technical team support and advise on all microbiological and scientific product dialogue. E&O's product portfolio also includes innovative service advantages from integrated stock management systems, to special delivery schedules using returnable packaging and enhanced Quality Control reporting on-line 24/7.

PRODUCT CODE	PETRI-DISHES
<b>P090</b>	Triple Vented 90mm Crystal Polystyrene
<b>P055</b>	Six Vented 55mm Crystal Polystyrene
<b>P140</b>	Triple Vented 140mm Crystal Polystyrene
<b>PB90</b>	Triple Vented 90mm Two Compartment Crystal Polystyrene
<b>PT90</b>	Triple Vented 90mm Three Compartment Crystal Polystyrene
<b>PLSQ</b>	Four Vented 120mm Square Crystal Polystyrene
<b>PCON</b>	Four Vented 55mm Grip lid Crystal Polystyrene Contact

## WAREHOUSING – LOGISTICS – DISTRIBUTION

E&O's finished goods "stock" warehousing facility is split into four clearly defined and controlled temperature areas:

- Ambient 15°C – 25°C
- Air-conditioned 8°C – 12°C
- Refrigerated 2°C – 8°C
- Deep-frozen -18°C to -20°C

Following manufacturing, all finished stock is stored within these controlled conditions and locations prior to being "batch released" post routine QC/QA testing, ready for picking/packing and shipping.

All products are packaged and labelled with industry standard coding for clear identification and compatible for barcode reading/scanning.

Extensive transport validation has been carried out on plated media. A selection of media was subjected to actual transportation over 1400km lasting 73.7 hours with temperatures ranging from 11°C to 23°C. Results showed that transportation by road did not affect the utility of any products subsequently tested at end of shelf-life. Plated media can be used up to and including the expiry date even after exposure to higher than recommended temperatures during transportation.

## ORDERS & ENQUIRIES:

All the “listed products” along with the volumes and the containers are routinely in stock. E&O can manufacture to suit your specific application and quote accordingly. All nonstock items will be subject to a minimum order charge and will be quoted on an annual quantity basis. Bespoke formulations can be designed and manufactured, for further details please contact our Customer Service/Technical support department.
